

Fertilizer Recommendation System for Disease Prediction

Date	18 November 2022
Team ID	PNT2022TMID18295
Project Name	Fertilizers Recommendation System for Disease Prediction

PROBLEM STATEMENT:

Mr. John is a 65 years old man. He had a own farming land and do Agriculture for past 30 Years , In this 30 Years heFaced a problem in Choosing Fertilizers and Controlling of Plant Disease.

- John wants to know the better recommendation for fertilizers for plants with the disease.
- He has faced huge losses for a long time.
- This problem is usually faced by most farmers.
- Mr. John needs to know the result immediately

Who does the problem affect?	Persons who do Agriculture
What are the boundaries of the problem?	People who Grow Crops and facing Issues of Plant Disease

What is the issue?	In agricultural aspects, if the plant is affected by leaf disease, then it reduces the growth and productiveness.
When does the issue occur?	During the development of the crops as they will be affected by various diseases

Where does the issue occur?	The issue occurs in agriculture practicing areas, particularly in rural regions.
What solution to solve this issue?	An automated system is introduced to identify different diseases on plants by checking the symptoms shown on the leaves of the plant.
What methodology used to solve the issue?	Deep learning techniques are used to identify the diseases and suggest the precautions that can be taken for those diseases
